U.S. Dried Fruits & Nuts

Item #	Product	Picture	Harmonized #	Description	Benefits
701	Blueberries		08.13.40.00	The Blueberry is rich in antioxidants and it is thought to help improve vision and strengthen blood vessels. Due to their nutritional value and health benefits they are considered to be a superfood.	A Blueberry is low in fat, and is a good source of fiber, and Vitamin C. Blueberry has also been known to reduce bad cholesterol.
702	Cranberries		08.13.20.00	Dried Cranberries go through the same process as grapes and raisins. They are partially dehydrated, but contain the same nutrients as a fresh cranberry. Can be used in salads, trail mix, cereal, oatmeal, or by themselves.	Dried Cranberries contain dietary fibers, antioxidants, Vitamin A, and Vitamin C. They also contain no cholesterol. Their high nutritional value makes them a superfood.
703	Raisins		08.06.20.00	We offer three varieties: Golden Raisins, Thompson Seedless Raisins, and Flame Raisins. The Golden Raisins are specially treated to preserve their golden color. Thompson Seedless and Flame Raisins are sun dried without using any chemical treatment. Flame Raisins are a popular choice for baking.	Raisins contain protein, dietary fiber, iron, potassium, Vitamin C, magnesium, antioxidants, and calcium.
704	Peaches		08.13.40.10	The peach is native to China and cultivated throughout the world. It is a strong juicy fruit. Depending on variety, peaches have slightly different yellow or white colors and skins. It tastes mellow or sweet.	Peach is a good source of Vitamin A, dietary fiber and potassium. Dried Peach also contains Vitamin C, calcium, magnesium, phosphorous, niacin, and zinc. It has been said that these vitamins and minerals can help the immune system, balanced iron absorption, and build bone strength.
705	Pitted Prunes		08.13.20.00	Pitted Prunes, also known as dried plums, are plums that have been dehydrated. California is responsible for producing 99% of the dried prunes in the U.S. and 60% of the worlds supply. Pitted prunes are available in a variety of sizes that range from 40 - 70 count per pound. Pitted Prunes are a natural source of vitamins and minerals.	Pitted Prunes contain copper, potassium, Vitamin K, Vitamin C, Vitamin A, calcium, magnesium, and phosphorous. They also include additional vitamins and minerals.
				Since ancient times, Almonds have been prized throughout the world for their delicious taste, crunchy texture, and for	Almonds have a high concentration of antioxidant like Vitamin E, and high fiber content. Almonds have also been known to

706	Almonds		08.02.12.00	their nutritional value. Almonds grow on trees that bloom from February through March.	act as a cough suppressant. As a vegetal food it has no cholesterol and 93% of its fat are unsaturated. It is also a major source of calcium, magnesium, potassium, copper, phosphorus, and zinc.
707	Cashews		08.01.32.00	Cashews, like all nuts, are an excellent source of protein and fiber. Cashews are great for cooking, baking, or snaking. They are kidney-shaped nuts that grow on Cashew trees, and they have less fat than many other types of nuts.	Cashews contain copper, manganese, magnesium, zinc, and phosphorus. They are also a good source for antioxidants.
708	Hazelnuts		08.02.22.00	Hazelnuts grow in clusters on Hazelnut trees. Once the nut is ripe the husk opens and lets the nut fall. Hazelnuts are usually between a spherical to oval shape.	Hazelnuts contain high levels of Vitamin E, copper, and manganese. They are also low in sodium and cholesterol.
709	Pistachios		08.02.50.00	Californian Pistachios provide high-energy nutrients. Each one-ounce serving of shelled pistachios (49 kernels) offers 300 milligrams of potassium, six grams of protein, nine grams of total carbohydrates, and three grams of dietary fiber	Pistachios are low in cholesterol and sodium. It is a good source of Vitamin B6, thiamin, and rich in copper and magnesium.
710	Walnuts		08.02.32.00	The Californian walnut is considered one of the world's best thanks to its taste, appearance, color, and durability. Through the introduction of new varieties and modern handling techniques we have enhanced the virtues given by the environmental conditions of our country and achieved a higher quality product. The nut is mechanically dehydrated to optimum 8% moisture level.	Walnuts contain Vitamin B6 and Vitamin E (high antioxidant power). About 14% and 18% of its weight corresponds to protein. Walnuts have a high content of unsaturated and polyunsaturated fats, which makes them a low cholesterol food and helps reduce its absorption. They provide calcium, potassium, and magnesium

Frozen Fruit Puree
